

# KARMA - GWW CONCEPT TABLE

GARDEN CENTER

**GROWN**  
WITH waterwick

1

## CONCEPT

The GWW (Grown with Waterwick) concept table for garden centers based on the ease of the Waterwick.

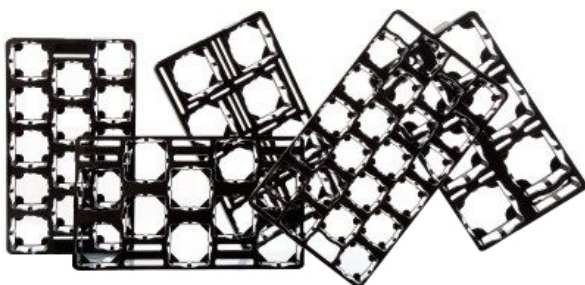

NO INVESTMENT NEEDED

## FLORATINO TRAYS

2

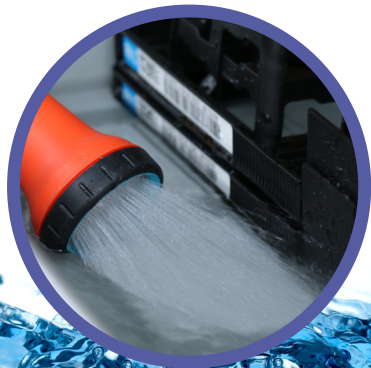

These trays have been in circulation in our sector for years and can easily be obtained through the auction. Turn them over and let the plant hang in the tray. This way you can easily create the ideal height at which the plant will absorb water according to its own needs. In addition, a tight set up on your table

3

## EASY WATERING

The ease of watering in the tables has never been easier. On an empty spot on the table, place the hose in the table and ensure a water level of 1cm. Because the Waterwick hangs down, each plant gets the opportunity to drink according to its own needs and the plant does not get too much or too little water. The ideal solution for convenience in your garden center.

## WIDE RANGE OF PLANTS

4

We offer a great diversity of flowering and green plants. The aim is to add one or two new plants to the range every year to keep surprising the customer.

5

## FRESHER PLANTS, LESS WASTE

Last but not least, it is a concept that keeps the plants looking fresh for a longer period of time due to the constant nutrition and which will also reduce the waste in your garden center. We all benefit from the Waterwick, grower, garden center and consumer.
